

Pre-Treatment

Keralase

We recommend you:

- Wash your hair with shampoo (no conditioner!) the night before or the morning of the treatment. Be sure to add no additional hair products, as hair must be clean and free of hair products at the time of treatment.
 - Stay out of the sun and use sun protection (SPF sunblock or hat) as much as possible for a week before and after each treatment.
 - Hair and scalp should have no presence of infection, rash, skin cancer, or any other condition that would be considered abnormal.
-

Post-Treatment

Keralase

We recommend you:

- After the treatment you may notice hairs in the telogen phase (resting phase) may shed due to the slight trauma from the laser. This does not occur regularly, but do not be alarmed if it occurs. Please notify your provider.
 - Once the hair and scalp dry naturally, you can resume normal activities including the application of hair products. Avoid washing your hair for 24 hours after the treatment.
 - Use KeraFactor Scalp Stimulating Solution, KeraFactor™ Scalp Stimulating Shampoo & Conditioner and other products as directed by your practitioner.
-

FOLLOW-UP:

To achieve the best results, complete the full treatment schedule at the intervals recommended by your technician.
